KNAPHEIDE ALUMINUM SERVICE BODIES

Aluminum service bodies from Knapheide feature a superior design and innovative construction.

Utilizing military-grade aluminum and structural adhesives are just a few of the features that place our aluminum service bodies far ahead of the competition.

STANDARD ALUMINUM SERVICE BODIES

In order to provide customers with the utmost confidence in our aluminum service bodies, we put them through the most rigorous testing program in history. They were subjected to the harshest environments and applications possible in our lab, on proving grounds — and by real customers like you.

Choose a Knapheide Aluminum Service Body and you'll get corrosion resistance, increased payload, and an aluminum service bed that is just as durable as steel.

AEROSPACE ASSEMBLY TECHNOLOGY

Assembled entirely from Grade 5 hardware and structural rivets that are coated specifically not to corrode with aluminum materials.

COMMITMENT TO CORROSION RESISTANCE

Aluminum bodies are naturally corrosion resistant. Where steel fasteners are used, those fasteners are coated with "EcoGuard" to eliminate the interaction between the steel and aluminum.

This aluminum assembly method both allows us to create products with the highest level of corrosion resistance available.
